## Hot off the press!

### **Farm ON, Dairy STRONG!**

While much of the world has been silenced by quarantine, America's dairy farmers continue to farm on. This season, the crops will still get planted, the calves will be fed, the cows will be milk and food will continue to be produced, just like it's been for generations.<sup>1</sup>

While we are encouraged to 'Stay Safe at Home' many essential services are encouraged to do so in a productive manner. Dairy is one of those. Milk continues to flow, cheese is being made, yogurt is being created. All of these are products rich in protein and other nutrients especially essential to keep people healthy and strong. Farm on! Dairy Strong! Live Long!
